UNIVERSAL

RIUK F1 series intelligent advertising cutting machine specializes in cutting PP Paper, KT boards, Chevron boards and other advertising materials. The product breaks through the traditional limitations of manual cutting, realizes the automatic cutting of various materials, and improves the production efficiency and accuracy.

Cutting materials: PVC board, PP board, medium and low density polyethylene, etc.

of cutting marks

of patterns

By adjusting the depth of the blade tip, only the upper half of the material can be cut through.

Original sensor high precision positioning technology

More accurate positioning, effectively reducing failure rate.

Fine plate frame

The equipment is integrally welded with high-strength steel, accurately processed by a large gantry milling machine, and undergoes strict anti-rust treatment to ensure that the equipment

Application Areas

Suitable for all kinds of PP Paper/photos, KT board, Chevron/PVC board, corrugated board, reflective film, self-adhesive, board paper card EVA, ABS board and other materials.

3 METERS PER SECOND
FASTER, MORE STABLE AND MORE ACCURATE

Performance self-monitoring system

Real-time maintenance system

Real-time monitoring of the main motor, blade, and other key components, ensuring the stable operation of the equipment.

Real-time monitoring of the main motor, blade, and other key components, ensuring the stable operation of the equipment.
